Our Most
Balanced
Solution

- Unparalleled solution in the market
- The widest, most versatile VRV system to easily decarbonize buildings now
- Top sustainability over the entire lifecycle

R-410A

Replacing existing VRV/VRF systems in the most cost-effective way

VRV IV⁺ LOOP
BY DAIKIN

GWP	Type
2,088	A1

- Using 100% reclaimed refrigerant

Your guide to the F-gas regulation

Key elements of the revised F-gas regulation

- A stricter phase-down path from 2025 onwards and a phase-out of virgin HFCs by 2050, with a planned review in 2030
- Stricter GWP limits for specific types of products
- Products placed on the market before a GWP limit comes into force can continue to be sold, installed, operated and serviced throughout their entire lifetime

Daikin VRV, ahead of the F-gas regulation

- All VRV 5 investments made are **fully future-proof** and the best answer to decarbonise buildings today!
- A CO₂ alternative for customers requesting so-called natural refrigerants

F-gas regulation timeline and key refrigerants

You can still sell, maintain and repair after the ban

- Servicing of existing equipment remains possible for the entire lifetime of products
- How a ban will take effect:

Find out more

what the F-gas regulation means for you in terms of leak checks, certifications and more on our F-gas webpage!

Benefits of VRV systems

VRV systems offer buildings maximum design flexibility, low running costs and high comfort thanks to the advantages of direct expansion (DX) systems:

Responsive by design

- **Immediate reaction** to changing conditions helps avoid overheating
- **Highly efficient:** Only 2 energy transfer steps are needed (from air to refrigerant, and from refrigerant to air)¹

Quick and easy to install:

- **All-in-one box solution** without any requirement for field supplied equipment (e.g. gauges, pumps and valves)
- **Limited space requirements:** All components are integrated, and refrigerant piping is compact

Precise climate zone control:

- Only provide heating or cooling **where needed**
- **High comfort levels:** Individual control and simultaneous cooling and heating for perfect personal environment

Integrated building solution

- Including smart cloud controls, ventilation, ...
- Fresh air solution with energy recovery, air purification, humidification and air discharge temperature control
- Smart central control and energy optimisation via the cloud

VRV total solution

Typically, many buildings today rely on several separate systems for heating, cooling, air curtain heating and hot water. As a result energy is wasted. To provide a much more efficient alternative, VRV technology has evolved into ...

... a total solution managing up to

70%

of a buildings energy consumption giving large potential to cost saving.

Heating and cooling for year round comfort

Fresh air heat recovery ventilation for high quality environments

Controls for maximum operating efficiency

Air curtains for optimum air separation

Efficient production of hot water

Underfloor heating/cooling for efficient space heating/cooling

Cooling for server rooms, telecom shelters

Average hotel energy consumption

Average office energy consumption

Integrate third party equipment

Integrate third party equipment

9 reasons why VRV is unique in the market

1 Leader in decarbonisation

- VRV 5: Leading R-32 portfolio, offering the lowest carbon footprint today
- CO₂ VRV: The low GWP solution using R-744 (CO₂) refrigerant
- L∞P by Daikin: Avoiding over 400,000 kg of virgin refrigerant being produced every year

VRV 5 CO₂ VRV

2 Efficiency

- Variable Refrigerant Temperature for top seasonal efficiency
- Round flow cassette and concealed ceiling units with auto cleaning filter
- The partner for your BREEAM, LEED or WELL project

BREEAM®
WELL

LEED®
LEADERSHIP IN ENERGY AND
ENVIRONMENTAL DESIGN

3 Comfort

- Provide high indoor air quality through seamless integration of VAM and AHU's (For R-32 and R-410A)
- Variable Refrigerant Temperature preventing cold draughts thanks to high outblow temperatures
- True continuous heating preventing indoor temperature fluctuations / variations during defrost
- Presence and floor sensors direct the air flow away from persons, while ensuring an even temperature distribution
- UV Streamer kit purifies the air of pollutants such as viruses, bacteria, fine dust (PM1), odours, allergens, etc

4 Reliability

- Refrigerant cooled PCB provides constant cooling, independent of outdoor air conditions
- Most extensive testing before new units leave the factory
- Widest sales network with all spare parts available in Europe
- Preventive maintenance via Daikin Cloud Plus
- Auto cleaning filters to further enhance reliability thanks to clean air-filters
- Dedicated technical cooling setting

5 Design

- Widest ever range of cassette panels
 - Available in white and black
 - Sleek designer panel range
- Daikin Emura, unique iconic design
- Fully flat cassette, seamlessly integrated in the ceiling
- Madoka Plus:
 - A touch screen controller with sleek & stylish design
 - App connectivity using Madoka assistant

6 Controls

- Daikin Cloud Plus for online control, energy monitoring, comparison of multisite, diagnostic and optimisation of equipment and predictive maintenance
- Voice control via Amazon Alexa and Google Assistant through Onecta app (For VRV 5 models)
- Madoka Plus: experience the perfect blend of design & performance.
- Intelligent Touch manager: A cost-effective mini BMS integrating all Daikin products
- Easy integration in third party BMS via BACnet, LonWorks, Modbus, KNX

7 Installation

- Automatic refrigerant charge and refrigerant containment check
- Plug & play Daikin Air Handling Unit connection
- VRV configurator software for the fastest commissioning, configuration and customisation
- Outdoor unit display for quick on-site settings and detailed error readouts for improved customer support
- Limited space requirements for piping
- Selection software with floor plan integration, integrated with latest legal standards

Our WebXpress software with visual floorplan

7-segment display

8 Inventor of VRV with over 40 years of leadership

- Market leader of VRV systems since 1982
- Over 90 years of expertise in heat pump technology
- Designed for and produced in Europe
- Innovator setting the market standard with technologies such as Variable Refrigerant Temperature, Continuous Heating, Shīrudo technology, ...

9 A solution for every application

- Heat recovery for simultaneous cooling and heating
- Maximum flexibility for geothermal applications with water-cooled systems
- Hot and cold climate solutions offering efficient cooling up to 52°C and heating down to -25°C
- Space saving mini VRV solutions, offering the most compact VRV
- The invisible VRV, a unique solution when the outdoor unit must be compact and completely invisible
- Replacement solutions to replace existing systems in the most cost-effective way

The VRV air conditioning system is the world's first individual air conditioning system with variable refrigerant flow control and was commercialised by Daikin in 1982. VRV is the trademark of Daikin Industries Ltd, which is derived from the technology we call "variable refrigerant volume". BREEAM is a registered trademark of BRE (the Building Research Establishment Ltd. Community Trade Mark E5778551). The BREEAM marks, logos and symbols are the Copyright of BRE and are reproduced by permission. LEED® is the preeminent program for the design, construction, maintenance and operations of high-performance green buildings. LEED® and its related logo, is a trademark owned by the U.S. Green Building Council® and is used with permission.

Decarbonisation made easy

Top sustainability

Market-leading
seasonal efficiency

- SCOP up to 200.5%
- SEER up to 324.5%
- Tested with real life indoor units

Full transparency of total
life cycle impact

- The available EPD certification outlines the environmental impact of VRV 5 over its lifetime
- Ideal for green building certification

Reduced direct
CO₂ impact by 71%
compared to R-410A
systems

- 68% lower Global Warming Potential
- 15% less refrigerant charge
- Single component refrigerant
- Reduced frequency of F-gas tightness inspections

For detailed information on the specifications of a particular range, please consult the product pages in this catalog.

A VRV 5 system for every VRV application

- Unparalleled outdoor unit range
- 4 different ranges
- Capacity from 12.1 up to 87.5 kW

Versatile

- Down to -20°C in heating
- Up to $+52^{\circ}\text{C}$ in cooling

- 165m longest length
- 90m height difference
- 1,000m total length
- Compatible with Tightfit, fireless copper pipe connector

- Sound pressure down to 39 dB(A)
- Increased installation space flexibility
- Easier project design
- Meet local noise regulation requirements out-of-the-box

- Ideal for monovalent heating
- Available on all multi combination models

Unique Shîrudo Technology provides full peace of mind out of the box

- No need for complex calculations to select safety measures
- No additional installation and commissioning work
- No visual impact of additional sensors etc.
- No additional work and considerations in case of layout changes
- No periodic safety checks

Check out
the Shirudo Technology
video!

What is included in Shîrudo Technology?

- **Complete peace of mind** as all refrigerant control measures are factory-integrated, ensuring compliance to the IEC60335-2-40 product standard, 3rd party certified by a Notified Body

Leak detection
sensor in every
indoor unit

Audible & visual
alarm in Madoka
controller or
via iTM

Shutoff valves
in the outdoor unit
or SV box

Specially
developed
algorithms

- Full **validation** of your project via our Xpress software

Widest R-32 portfolio

Match any application

Widest range of dedicated R-32 indoor units on the market

- Meet any comfort and aesthetical demand
- 11 unit models in 96 variations
- Capacities from 1.1 kW in cooling, up to 31.5 kW in heating
- Factory integrated safety measures for complete peace of mind

Easily integrates fresh air units

- Plug & play ventilation solutions from 150 up to 140,000 m³/h
- For indoor (in-ceiling or floor) and outdoor installation
- Wide choice of filtration options to optimise IAQ
- Offers different energy recovery, air purification, humidification and air discharge temperature control options

Connectable to all Daikin smart controls

Daikin Cloud Plus

- Smart centralised control & energy optimisation
- Predictive maintenance indicates when maintenance or replacements are needed
- Remote site access enables to optimise and monitor the system without the need for an on-site visit

Onecta app

- Intuitive control, no matter where you are

Excellent support

Wide network of experts with specialised advice

Maximise your BREEAM/LEED score with expert support from design to execution

Our WebXpress software with visual floorplan interface makes design easy and ensures compliance with product standards

Daikin Europe Research and Development Center - 11,000m² Testing facilities & 10,200m² office space.

Decarbonisation in practice

Learn how Daikin experts assist customers to reach their sustainability and comfort targets, while staying in budget

"A landmark project meeting the highest standards, the Meylan Arteparc sets the bar for designing future-proof buildings that consistently deliver on *energy performance and comfort*"

Arteparc office complex

Daikin VRV heat pumps contribute to low carbon footprint and is awarded with the HQE excellent label

Location: Grenoble, France
Type: New built, commercial complex
Project size: 25,000m²
Total outdoor units: 115

Challenges:

- Achieve HQE BBC (Low Carbon Building) certification label
- Provide an HVAC system to offset the increased CO₂ emissions, caused by additional use of concrete

Daikin solution:

- **Close co-operation** between design office and Daikin design support
- In-depth study to **optimise the air flows** of the full installation to maximise system performance and user experience
- Daikin's VRV 5 with R-32 was crucial to support the required offsetting of CO₂, with a **whole life carbon reduction of 27%** compared to R-410A solutions

"Daikin offers 24/7 monitoring with predictive maintenance for *complete peace-of-mind*. Issues are solved before they occur, maximising room availability and customer satisfaction."

Victoria hotel, Park Plaza

Location: Amsterdam, The Netherlands

Type: Refurbishment, Hotel

Project size: 7 floors, 150 rooms, 25m²/room

Total outdoor units: 12

Challenges:

- Provide a future proof, low carbon solution
- Keep historical building exterior intact
- Provide total peace of mind

Daikin solution:

- Implementation of **VRV 5 heat recovery**, using lower GWP refrigerant R-32 boosting efficiency thanks to the re-use of excessive heat from rooms in cooling, to heat up rooms in need of heating
- The **modular and compact** concept of VRV outdoor units and very small piping made it the best solution to keep the historical value of the building.
- With **Shīrudo Technology** all legislative requirements are factory integrated, keeping additional design work to a minimum

VRV 5 Heat Recovery

The sustainability champion

- Reduced CO₂ equivalent thanks to the use of lower GWP R-32 refrigerant and lower refrigerant charge
- Single component refrigerant, easy to re-use and recycle
- Top sustainability over the entire lifecycle, thanks to market leading real-life seasonal efficiency
- "Free" heat through efficient 3-pipe heat recovery, transferring heat from areas needing cooling to areas requiring heat and vice versa
- Tackle any room application, thanks to Shīrudo technology
- Specially designed indoor units for R-32, ensuring low sound and maximum efficiency
- Simultaneous cooling and heating ensure optimal personal comfort for guests and tenants
- Continuous heating during defrost for multi models
- Maximum installation flexibility with piping lengths up to 165 metres and a total length of 1,000 metres
- Sound pressure down to 40 dB(A), thanks to 5 low sound steps
- ESP up to 78 Pa allows ducting
- Incorporates VRV standards & technologies: Variable Refrigerant Temperature, continuous heating, VRV configurator, 7 segment display and full inverter compressors, 4-side heat exchanger, refrigerant cooled PCB, new DC fan motor

"Free" heating through heat recovery

Simultaneous cooling & heating for maximum comfort

3-pipe technology: up to 15% more efficient compared to 2-pipe system

Compatible to IEC60335-2-40 Ed.7, allowing even more flexible system design!

(1)Cooling: indoor temp. 27°CDB, 19°CWB; outdoor temp. 35°CDB; equivalent piping length: 7.5m; level difference: 0m | (2)Heating: indoor temp. 20°CDB; outdoor temp. 7°CDB, 6°CWB; equivalent refrigerant piping: 7.5m; level difference: 0m | (3)The actual number of units depends on the connection ratio (CR) and the restrictions for the system. | (4)Sound power level is an absolute value that a sound source generates. | (5) Sound pressure level is a relative value, depending on the distance and acoustic environment. For more details, please refer to the sound level drawings. | (6)Refer to refrigerant pipe selection or installation manual | (7)RLA is based on following conditions: indoor temp. 27°CDB, 19°CWB; outdoor temp. 35°CDB | (8)MFA is used to select the circuit breaker and the ground fault circuit interrupter (earth leakage circuit breaker). | (9)Maximum allowable voltage range variation between phases is 2%. | (10)Voltage range: units are suitable for use on electrical systems where voltage supplied to unit terminal is not below or above listed range limits. | MSC means the maximum current during start up of the compressor. This unit uses only inverter compressors. Starting current is always ≤ max. running current. | In accordance with EN/IEC 61000-3-12, it may be necessary to consult the distribution network operator to ensure that the equipment is connected only to a supply with Ssc ≥ minimum Ssc value | MCA must be used to select the correct field wiring size. The MCA can be regarded as the maximum running current. | Sound values are measured in a semi-anechoic room. | EN/IEC 61000-3-12: European/international technical standard setting the limits for harmonic currents produced by equipment connected to public low-voltage system with input current > 16A and ≤ 75A per phase | Ssc: Short-circuit power | For detailed contents of standard accessories, see installation/operation manual | Multi combination (10~28HP) data is corresponding with the standard multi combination | Air Flow Rate (AFR) of multi outdoor systems is sum of AFR of the individual systems it consists of

Multi branch selector (BSSV) - for VRV 5 Heat Recovery

Completely redesigned for faster installation
and easier servicing

Easy installation thanks to fewer brazing points

VRV 5: only 24 brazing points and no joint kits

VRV IV+: 39 brazing points and
3 joint kits

Easy servicing in false ceilings thanks to sliding down PCB

- Unique range of multi BS boxes allowing efficient 3-pipe heat recovery
- No limitation on room size, thanks to Shîrudo Technology (1)
- Continued operation in case of a leak: only the specific branch is closed, maintaining full operation of the system
- Faster installation thanks to Refrigerant Flow Through reducing the number of brazing points and joint kits
- Easy servicing in false ceilings thanks to sliding down PCB
- Limited ceiling void required
- Quick on-site settings, indication of service parameters and easy read out of errors thanks to 7 segment display
- Up to 16kW capacity available per port
- Connect up to 250 class unit (28kW) by combining 2 ports
- No limit on unused ports allowing phased installation
- Faster installation thanks to open port connection
- Allows multi tenant applications

BS6A14AV1B9

Compatible to IEC60335-2-40 Ed.7, allowing even more flexible system design and reducing the box weight!

VRV 5 Heat Pump

Daikin's solution for comfort & low energy consumption

- Reduced CO₂ equivalent thanks to the use of lower GWP R-32 refrigerant and lower refrigerant charge
- Single component refrigerant, easy to re-use and recycle
- Greatest sustainability over the entire lifecycle, thanks to market leading real-life seasonal efficiency
- Tackle small room applications without any additional measures, thanks to Shīrudo Technology
- Specially designed indoor units for R-32, ensuring low sound and maximum efficiency
- Continuous heating during defrost for multi models
- Like for like R-410A installation flexibility with piping lengths up to 165 meters and a total length of 1,000 meters
- Sound pressure down to 40 dB(A) thanks to 5 low sound steps
- ESP up to 78 Pa to allow ducting
- Wide operation range of up to +46°C in cooling and down to -20°C in heating
- Incorporates VRV standards & technologies: Variable Refrigerant Temperature, continuous heating, 7 segment display and full inverter compressors, 4-side heat exchanger, refrigerant cooled PCB

Wide piping flexibility to tackle any VRV application

5 low sound steps

Flexibility to take care of every room

VRV 5 S-series

Lower CO₂ equivalent and market-leading flexibility

- Reduced CO₂ equivalent thanks to the use of lower GWP R-32 refrigerant and lower refrigerant charge
- Top sustainability over the entire lifecycle, thanks to market leading real-life seasonal efficiency
- Low-height single fan range
- Easy to transport thanks to lightweight and compact design
- Wide access area to easily reach all key components
- Tackle small room applications without any additional measures, thanks to Shîrudo technology
- Specially designed indoor units for R-32, ensuring low sound and maximum efficiency

Optional shut off valve box (SV)

To tackle even the most stringent applications in a future proof way

- For the vast majority of applications no SV box is needed to tackle the IEC requirements
- In case of very small rooms an optional SV box ensures compliance to IEC60335-2-40 for any room
- Continued operation in case of a leak: only the specific branch is closed, maintaining full operation of the system
- Fast installation thanks to Refrigerant Flow Through reducing the number of brazing points and joint kits

- Easy servicing in false ceilings thanks to sliding down PCB

- Limited ceiling void required
- Connect up to 250 class unit (28kW) to 1-port SV box or by combining 2 ports on multi SV box combining 2 ports on multi SV box

Capacity class (kW)

Type	Model	Product name	10	15	20	25	32	40	50	63	71	80	100	125	140	200	250
Ceiling mounted cassette	UNIQUE Round flow cassette 360° air discharge for optimum efficiency and comfort • Auto cleaning function ensures high efficiency • Intelligent sensors save energy and maximise comfort • Flexibility to suit every room layout • Lowest installation height in the market! • Widest choice ever in decoration panel designs and colors	 FXFA-A			•	•	•	•	•	•		•	•	•			UV Streamer kit
	UNIQUE Fully flat cassette Unique design that integrates fully flat into the ceiling • Perfect integration in standard architectural ceiling tiles • Blend of iconic design and engineering excellence • Intelligent sensors save energy and maximise comfort • Small capacity unit developed for small or well-insulated rooms • Flexibility to suit every room layout	FXZA-A		•	•	•	•	•	•								
	1-way blow cassette 1-way blow unit for corner installation • Compact dimensions enable installation in narrow ceiling voids • Flexible installation thanks to different air discharge options • New modern decoration panel	FXKA-A			•	•	•	•	•	•							
Concealed ceiling	Slim concealed ceiling unit Slim design for flexible installation • Compact dimensions enable installation in narrow ceiling voids • Medium external static pressure up to 44Pa • Only grilles are visible • Small capacity unit developed for small or well-insulated rooms • Reduced energy consumption thanks to DC fan motor	FXDA-A	•	•	•	•	•	•	•	•							Auto cleaning filter option
	Concealed ceiling unit with medium ESP Slimmest yet most powerful medium static pressure unit on the market! • Slimmest unit in class, only 245mm • Low operating sound level • Medium external static pressure up to 150Pa facilitates using flexible ducts of varying lengths • Automatic air flow adjustment function measures the air volume and static pressure and adjusts it towards the nominal air flow, guaranteeing comfort	FXSA-A		•	•	•	•	•	•	•		•	•	•	•		
	Concealed ceiling unit with high ESP ESP up to 250 Pa, ideal for extra large sized spaces • Optimum comfort guaranteed no matter the length of ductwork or type of grilles, thanks to automatic air flow adjustment • Large capacity unit: up to 31.5 kW heating capacity	FXMA-A							•	•		•	•	•		•	•
Wall mounted	Wall mounted unit For rooms with no false ceilings nor free floor space • Flat, stylish front panel is more easy to clean • Small capacity unit developed for small or well-insulated rooms • Reduced energy consumption thanks to DC fan motor • The air is comfortably spread up- and downwards thanks to 5 different discharge angles	FXAA-A		•	•	•	•	•	•	•							
Ceiling suspended	Ceiling suspended unit For wide rooms with no false ceilings nor free floor space • Ideal for comfortable air flow in wide rooms thanks to Coanda effect • Rooms with ceilings up to 3.8m can be heated or cooled very easily! • Can easily be installed in both new and refurbishment projects • Can even be mounted in corners or narrow spaces without any problem	FXHA-A					•		•	•		•					
	UNIQUE 4-way blow ceiling suspended unit Unique Daikin unit for high rooms with no false ceilings nor free floor space • Rooms with ceilings up to 3.5m can be heated up or cooled down very easily! • Can easily be installed in both new and refurbishment projects • Intelligent sensors save energy and maximise comfort • Flexibility to suit every room layout	FXUA-A							•		•	•					
Floor standing	Concealed floor standing unit Ideal for installation in offices, hotels and residential applications • Discreetly concealed in the wall, leaving only the suction and discharge grilles visible • Can even be installed underneath a window • Requires very little installation space as the depth is only 200mm • High ESP allows flexible installation	FXNA-A	•	•	•	•	•	•									
Cooling capacity (kW) ¹			1.1	1.7	2.2	2.8	3.6	4.5	5.6	7.1	8.0	9.0	11.2	14.0	16.0	22.4	28.0

We care	 Home leave operation	Maintains the indoor temperature at your specified comfort level during absence, thus saving energy.									
	 Fan only	The unit can be used as fan, blowing air without heating or cooling.									
	 Auto cleaning filter	The filter automatically cleans itself. Simplicity of upkeep means optimum energy efficiency and maximum comfort without the need for expensive or time-consuming maintenance.									
	 Floor and presence sensor	The presence sensor directs the air away from any person detected in the room, when the air flow control is on. The floor sensor detects the average floor temperature and ensures an even temperature distribution between ceiling and floor.									
Comfort	 Draught prevention	When starting to warm up or when the thermostat is off, the air discharge direction is set horizontally and the fan to low speed, to prevent draught. After warming up, air discharge and fan speed are set as desired.									
	 Whisper quiet	Daikin indoor units are whisper quiet. Also the outdoor units are guaranteed not to disturb the quiet of the neighbourhood.									
	 Auto cooling-heating changeover	Automatically selects cooling or heating mode to achieve the set temperature.									
Air treatment	 UV Streamer kit	Purifies the air of pollutants such as viruses, bacteria, fine dust (PM1.0), odours, allergens, etc ensuring a healthy and hygienic indoor environment									
	 Air filter	Removes airborne dust particles to ensure a steady supply of clean air.									
Humidity control	 Dry programme	Allows humidity levels to be reduced without variations in room temperature.									
Air flow	 Ceiling soiling prevention	Prevents air from blowing out too long in horizontal position, to prevent ceiling stains.									
	 Vertical auto swing	Possibility to select automatic vertical moving of the air discharge flaps for efficient air and temperature distribution throughout the room.									
	 Fan speed steps	5 + auto	3 + auto	3 + auto	3	3 + auto	3 (50-125) 3 + auto (200-250)	3 + auto	3	3 + auto	3 + auto
	 Individual flap control	Individual flap control via the wired remote controller enables you to easily fix the position of each flap individually, to suit any new room configuration. Optional closure kits are available as well.									
Remote control & timer	 Onecta controller (BRP069C51)	Control your indoor climate from any location via smartphone or tablet.									
	 Weekly timer	Can be set to start heating or cooling anytime on a daily or weekly basis.									
	 Infrared remote control	○ (1)	○ (1)		○ (1)	○ (1)	○ (1)	○ (1)	○ (1)	○ (1)	● (1)
	 Wired remote control	● (3)	● (3)	● (3)	● (3)	● (3)	● (3)	● (3)	● (3)	● (3)	● (3)
	 Centralised control	○	○	○	○	○	○	○	○	○	○
Other functions	 Auto-restart	The unit restarts automatically at the original settings after power failure.									
	 Self-diagnosis	Simplifies maintenance by indicating system faults or operating anomalies.									
	 Drain pump kit	Facilitates condensation draining from the indoor unit.									
	 Multi tenant	The indoor unit's main power supply can be turned off when leaving the hotel or office building.									

● standard ○ optional

- (1) Must be combined with Madoka wired remote controller.
 (2) Pre filter
 (3) A Madoka remote controller is a required option
 (4) In combination with REYA/RXYA/RXYSA8-12 outdoor units (for more information contact your sales representative).

4-way blow ceiling suspended unit

Slim concealed ceiling unit

Round flow cassette

Fully flat cassette

Concealed floor standing unit

Introduction	Residential indoor air quality	Heating	Split	Sky Air	Rooftop	VRV	Commercial Ventilation & Air purification	Marine Industry	Chillers	Fan coil units	Air handling units	Commercial & Transport Refrigeration	Control systems
--------------	--------------------------------	---------	-------	---------	---------	-----	---	-----------------	----------	----------------	--------------------	--------------------------------------	-----------------

Complete indoor comfort, including pure air

The round flow cassette

- Maximum comfort thanks to **360° air discharge** and **intelligent sensors**
- **Widest ever choice in panels** to match any interior

- **Auto cleaning panel** keeps the filter free of dust for maximum efficiency
- **UV streamer kit**
 - Purifies the air of pollutants such as viruses, bacteria, fine dust PM1, odours, allergens, etc ensuring a healthy and hygienic indoor environment
 - Unique catch & clean approach includes an ISO ePM1 60% (F7) filter, UV-C light and Streamer technology
 - Can be **retrofitted** into existing installations

99.9%

of viruses removed in 30 minutes,
thanks to Daikin's unique

Catch & Clean approach

Tested at Intertek

Results based on tests performed in the laboratories of Intertek, in a 28m³ room. Daikin's Round flow cassette (FXFQ125B) removes more than 99.9% of enveloped viruses such as Corona viruses.

* Additional details regarding this function can be found in the unit technical manual.

Tested according to
real life sized room

Round flow cassette

360° air discharge for optimum efficiency and comfort

- Optimised design for R-32 refrigerant
- Optional automatic filter cleaning panel results in higher efficiency & comfort and lower maintenance costs
- Two optional intelligent sensors improve energy efficiency and comfort
- Widest choice ever in decoration panels: designer panels in white (RAL9010) and black (RAL9005) and standard panels in white (RAL9010) with grey louvers or full white
- Bigger flaps and unique swing pattern improve equal air distribution
- Individual flap control: flexibility to suit every room layout without changing the location of the unit!
- Lowest installation height in the market: 214mm for class 20-63
- UV streamer kit, purifies the air of pollutants such as viruses, bacteria, fine dust (PM1.0), odours, allergens, etc ensuring a healthy and hygienic indoor environment
- Optional fresh air intake
- Standard drain pump with 675mm lift increases flexibility and installation speed

(1) Values are valid for the factory setting. | Cooling: indoor temp. 27°CDB, 19.0°CWB; outdoor temp. 35°CDB | Heating: indoor temp. 20°CDB; outdoor temp. 7°CDB, 6°CWB | The sound power level is an absolute value indicating the power which a sound source generates. | Voltage range: units are suitable for use on electrical systems where voltage supplied to unit terminal is not below or above listed range limits. | Maximum allowable voltage range variation between phases is 2%. | MCA/MFA: MCA = 1.1 x FLA | Instead of a fuse, use a circuit breaker | Select wire size based on the value of MCA | BYCQ140E2W1: pure white standard panel with grey louvers; BYCQ140E2W1W: pure white standard panel with white louvers; BYCQ140E2W1B: black standard panel with black louvers. | The BYCQ140E2W1W has white insulations. Be informed that formation of dirt on white insulation is visibly stronger and that it is consequently not advised to install the BYCQ140E2W1W decoration panel in environments exposed to concentrations of dirt. | Contains fluorinated greenhouse gases

Fully flat cassette

Unique design in the market that integrates fully flat into the ceiling

- Optimised design for R-32 refrigerant
- Fully flat integration in standard architectural ceiling tiles, leaving only 8mm
- Remarkable blend of iconic design and engineering excellence with an elegant finish in white or a combination of silver and white
- Two optional intelligent sensors improve energy efficiency and comfort
- 15 class unit especially developed for small or well-insulated rooms, such as hotel bedrooms, small offices, etc.
- Individual flap control: flexibility to suit every room layout without changing the location of the unit!
- Optional fresh air intake
- Standard drain pump with 630mm lift increases flexibility and installation speed

Ceiling mounted corner cassette

1-way blow unit for corner installation

- Optimised design for R-32 refrigerant
- Compact dimensions enable installation in narrow ceiling voids (only 200mm high)
- New modern decoration panel
- The air is comfortably spread up- and downwards thanks to 5 different discharge angles that can be programmed via the remote control
- Optional fresh air intake
- Standard drain pump increases flexibility and installation speed

New design!

Nominal cooling capacities are based on: indoor temperature: 27°CDB, 19°CWB, outdoor temperature: 35°CDB, equivalent refrigerant piping: 5m, level difference: 0m. | Nominal heating capacities are based on: indoor temperature: 20°CDB, outdoor temperature: 7°CDB, 6°CWB, equivalent refrigerant piping: 5m, level difference: 0m. | The sound power level is an absolute value indicating the power which a sound source generates. | Instead of a fuse, use a circuit breaker | Select wire size based on the value of MCA

Auto cleaning filter for concealed ceiling units

The unique automatic cleaning filter achieves higher efficiency and comfort with lower maintenance costs

Reduce running costs

- Automatic filter cleaning ensures low maintenance costs because the filter is always clean

Efficiency profile change for duct indoor unit during operation

Minimal time required for filter cleaning

- The dust box can be emptied with a vacuum cleaner for fast and easy cleaning
- No more dirty ceilings

Improved indoor air quality

- Optimum airflow eliminates draft and insulates sound

Superb reliability

- Prevents clogged filters for seamless operation

Unique technology

- Unique and innovative filter technology inspired by the Daikin auto cleaning cassette

How does it work?

- Scheduled automatic filter cleaning
- Dust collects in a dust box that's integrated into the unit
- The dust can easily be removed with a vacuum cleaner

Slim concealed ceiling unit

Slim design for flexible installation

- Optimised design for R-32 refrigerant
- 15 class unit especially developed for small or well-insulated rooms, such as hotel bedrooms, small offices, etc.
- Compact dimensions, can easily be mounted in a ceiling void of only 240mm

Serie A (15, 20, 25, 32)

- Medium external static pressure up to 44Pa facilitates unit use with flexible ducts of varying lengths
- Discretely concealed in the wall: only the suction and discharge grilles are visible
- Optional auto cleaning filter option ensures maximum efficiency, comfort and reliability by regular filter cleaning
- Flexible installation, as the air suction direction can be altered from rear to bottom suction

- Standard drain pump with 600mm lift increases flexibility and installation speed

Auto cleaning filter option

(1) Must be combined with Madoka wired remote controller | Contains fluorinated greenhouse gases

Concealed ceiling unit with medium ESP

Slimmest yet most powerful medium static pressure unit on the market

- Optimised design for R-32 refrigerant
- Slimmest unit in class, only 245mm (300mm built-in height) and therefore narrow ceiling voids are no longer a challenge

- Quiet operation: down to 25dBA sound pressure level
- Medium external static pressure up to 150Pa facilitates using flexible ducts of varying lengths
- Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- Discretely concealed in the wall: only the suction and discharge grilles are visible
- 15 class unit especially developed for small or well-insulated rooms, such as hotel bedrooms, small offices, etc.
- Optional fresh air intake
- Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation device is required

* Brings in up to 10% of fresh air into the room

- Standard built-in drain pump with 625mm lift increases flexibility and installation speed

Automatic Airflow

Adjustment function

Automatically selects the most appropriate fan curve to achieve the units' nominal air flow within $\pm 10\%$

Why?

After installation the real ducting will frequently differ from the initially calculated air flow resistance
 * the real air flow may be much lower or higher than nominal, leading to a lack of capacity or uncomfortable air temperature
 Automatic Airflow Adjustment function will adapt the unit's fan speed to any ducting automatically (10 or more fan curves are available on every model), making installation much faster

(1) Must be combined with Madoka wired remote controller | Contains fluorinated greenhouse gases

Concealed ceiling unit with high ESP

Ideal for large sized spaces ESP up to 250 Pa

- Optimised design for R-32 refrigerant
- High external static pressure up to 250Pa facilitates extensive duct and grille network
- Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- Discretely concealed in the wall: only the suction and discharge grilles are visible
- Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation device is required (50-125 class)

Fresh air intake opening in casing

* Brings in up to 10% of fresh air into the room

- Flexible installation, as the air suction direction can be altered from rear to bottom suction (50-125 class)

- Standard built-in drain pump with 625mm lift increases flexibility and installation speed (optional for 200-250)

- Large capacity unit: up to 31.5 kW heating capacity

Automatic Airflow Adjustment function

Automatically selects the most appropriate fan curve to achieve the units' nominal air flow within $\pm 10\%$

Why?

After installation the real ducting will frequently differ from the initially calculated air flow resistance
* the real air flow may be much lower or higher than nominal, leading to a lack of capacity or uncomfortable air temperature

Automatic Airflow Adjustment function will adapt the unit's fan speed to any ducting automatically (10 or more fan curves are available on every model), making installation much faster

Contains fluorinated greenhouse gases

Wall mounted unit

For rooms with no false ceilings nor free floor space

- Optimised design for R-32 refrigerant
- Flat, stylish front panel blends easily within any interior décor and is easier to clean
- Can easily be installed in both new and refurbishment projects
- The air is comfortably spread up- and downwards thanks to 5 different discharge angles that can be programmed via the remote control
- Maintenance operations can be performed easily from the front of the unit

Ceiling suspended unit

For wide rooms with no false ceilings nor free floor space

- Optimised design for R-32 refrigerant
- Ideal for comfortable air flow in wide rooms thanks to Coanda effect: up to 100° discharge angle

- Even rooms with ceilings up to 3.8m can be heated up or cooled down very easily without capacity loss
- Can easily be installed in both new and refurbishment projects
- Can easily be mounted in corners and narrow spaces, as it only needs 30mm lateral service space

- Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation device is required

* Brings in up to 10% of fresh air into the room

- Stylish unit blends easily with any interior. The flaps close entirely when the unit is not operating.

4-way blow ceiling suspended unit

Unique Daikin unit for high rooms with no false ceilings nor free floor space

- Optimised design for R-32 refrigerant
- Even rooms with ceilings up to 3.5m can be heated up or cooled down very easily without capacity loss
- Can easily be installed in both new and refurbishment projects
- Two optional intelligent sensors improve energy efficiency and comfort
- Individual flap control: flexibility to suit every room layout without changing the location of the unit!

- Stylish unit blends easily with any interior. The flaps close entirely when the unit is not operating
- Optimum comfort guaranteed with automatic air flow adjustment to the required load
- 5 different discharge angles between 0 and 60° can be programmed via the remote control

- Standard drain pump with 720mm lift increases flexibility and installation speed

Concealed floor standing unit

Designed to be concealed in walls

- Optimised design for R-32 refrigerant
- Discretely concealed in the wall: only the suction and discharge grilles are visible
- Requires very little installation space as the depth is only 200mm

- Its low height (620 mm) enables the unit to fit perfectly beneath a window
- High ESP allows flexible installation

Most versatile R-32 VRF floor standing unit in the market

Typically, R-32 floor standing models have more stringent room size requirements than wall mounted or ceiling installed units to comply with the IEC60335-2-40 product standard.

However, with Daikin, this is no longer a limitation. By uniquely integrating the integral circulation airflow principle into our advanced Shīrudo technology, our floor standing models offer the same installation flexibility as wall mounted and cassette units.

Biddle air curtains

Biddle air curtains provide highly efficient solutions for retailers and consultants to combat the issue of climate separation across their outlet or office doorway.

Benefits of Biddle air curtains

- Connectable to ERQ and VRV units
- Unified range for R-32 and R-410A refrigerant
- Payback period of less than 1.5 years compared to installing an electric air curtain

3 different models to choose from:

Free-hanging model (F):
easy wall mounted installation

Cassette model (C):
mounted into a false ceiling leaving only the decoration panel visible

Recessed model (R):
neatly concealed in the ceiling

Select your Biddle air curtain range

Biddle air curtain nomenclature

Biddle air curtain

- Connectable to ERQ and VRV DX outdoor units
- Unified model for R-32 and R-410A refrigerant
- Free-hanging model (F): easy wall mounted installation
- Cassette model (C): mounted into a false ceiling leaving only the decoration panel visible
- Recessed model (R): neatly concealed in the ceiling
- A payback period of less then 1.5 years compared to installing an electric air curtain
- Provides virtually free air curtain heating via recovered heat from indoor units in cooling mode (in case of VRV heat recovery)
- Easy and quick to install at reduced costs since no additional water systems, boilers and gas connections are required

475

Benefits of CO₂

- Using so-called natural refrigerant CO₂
- Low GWP value of 1, making it one of the most sustainable refrigerants
- Classified as non-flammable (A1), simplifying system design

Benefits of CO₂ VRV

- Enabling you to tackle projects requesting so-called “natural” refrigerants
- Maximise your BREEAM / LEED refrigerant score, thanks to the low GWP of 1
 - BREEAM V7: 3 of 3 credits in Pollution 01
 - LEED V5: 2 of 2 points in Enhanced Refrigerant Management
- Incorporates all typical VRV benefits
 - Quick and easy to design and install
 - Precise zone control with quick response to changing load
 - Connectable to Daikin's latest controllers such as Daikin Cloud Plus

CO₂ VRV installation example for supermarket

Capacity class (HP)

Model	10
Cooling Capacity	28.0
Heating Capacity	31.5
Air-cooled heat pump NEW CO₂ VRV - The low GWP solution - Using so-called natural refrigerant CO₂ - Low GWP of 1 - Non-flammable (A1) refrigerant RXYN-B 	•

CO₂ VRV indoor unit overview

Capacity class

Type	Model	Product name	40	50	63	80
Ceiling mounted cassette	NEW Round flow cassette 360° air discharge for optimum efficiency and comfort - Auto cleaning function ensures high efficiency - Intelligent sensors save energy and maximise comfort - Flexibility to suit every room layout - Widest choice ever in decoration panel designs and colors ROUND FLOW	FXFN-B 	•	•	•	•
Concealed ceiling unit with medium ESP	NEW Concealed ceiling unit with medium ESP - Slimmest yet most powerful medium static pressure unit on the market! - Slimmest unit in class, only 245mm - Low operating sound level - Medium external static pressure up to 120Pa facilitates using flexible ducts of varying lengths - Automatic air flow adjustment function measures the air volume and static pressure and adjusts it towards the nominal air flow, guaranteeing comfort	FXSN-B 	•	•	•	•
Cooling capacity (kW) ¹			4.5	5.6	7.1	9.0
Heating capacity (kW) ²			5.0	6.3	8.0	10.0

(1) Nominal cooling capacities are based on: indoor temperature: 27°CDB, 19°CWB, outdoor temperature: 35°CDB, equivalent refrigerant piping: 5m, level difference: 0m

(2) Nominal heating capacities are based on: indoor temperature: 20°CDB, outdoor temperature: 7°CDB, 6°CWB, equivalent refrigerant piping: 5m, level difference: 0m

CO₂ VRV

The low GWP solution

- Using the so-called natural refrigerant CO₂ (R-744)
- With a low GWP of 1, CO₂ is one of the most sustainable refrigerants
- Non-flammable (A1) refrigerant, simplifying system design
- Incorporates all typical VRV benefits: quick and easy to design and install, precise zone control with quick response to changing load

Round flow cassette

360° air discharge for optimum efficiency and comfort

- Optimised design for CO₂ refrigerant (R-744)
- Optional automatic filter cleaning panel results in higher efficiency & comfort and lower maintenance costs
- Two optional intelligent sensors improve energy efficiency and comfort
- Widest choice ever in decoration panels: designer panels in white (RAL9010) and black (RAL9005) and standard panels in white (RAL9010) with grey louvers or full white
- Bigger flaps and unique swing pattern improve equal air distribution
- Individual flap control: flexibility to suit every room layout without changing the location of the unit!
- Optional fresh air intake
- Standard drain pump with 675mm lift increases flexibility and installation speed

Values are valid for the factory setting. | Cooling: indoor temp. 27°CDB, 19°CWB; outdoor temp. 35°CDB | Heating: indoor temp. 20°CDB; outdoor temp. 7°CDB, 6°CWB | The sound power level is an absolute value indicating the power which a sound source generates. | Voltage range: units are suitable for use on electrical systems where voltage supplied to unit terminal is not below or above listed range limits. | Maximum allowable voltage range variation between phases is 2%. | MCA/MFA: MCA = 1.1 x FLA | Instead of a fuse, use a circuit breaker | Select wire size based on the value of MCA | BYCQ140E2W1: pure white standard panel with grey louvers; BYCQ140E2W1W: pure white standard panel with white louvers; BYCQ140E2W1B: black standard panel with black louvers. | The BYCQ140E2W1W has white insulations. Be informed that formation of dirt on white insulation is visibly stronger and that it is consequently not advised to install the BYCQ140E2W1W decoration panel in environments exposed to concentrations of dirt. | Contains fluorinated greenhouse gases

Concealed ceiling unit with medium ESP

Slimmest yet most powerful medium static pressure unit on the market

- Optimised design for CO₂ refrigerant (R-744)
- Slimmest unit in class, only 245mm (300mm built-in height) and therefore narrow ceiling voids are no longer a challenge

- Medium external static pressure up to 120Pa facilitates using flexible ducts of varying lengths
- Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- Discretely concealed in the wall: only the suction and discharge grilles are visible
- Optional fresh air intake
- Fresh air intake integrated in the same system thus reducing installation cost as no additional ventilation device is required
- Standard built-in drain pump with 625mm lift increases flexibility and installation speed

Fresh air intake opening in casing

* Brings in up to 10% of fresh air into the room

- Standard built-in drain pump with 625mm lift increases flexibility and installation speed

Automatic Airflow

Adjustment function

Automatically selects the most appropriate fan curve to achieve the units' nominal air flow within $\pm 10\%$

Why?

After installation the real ducting will frequently differ from the initially calculated air flow resistance
* the real air flow may be much lower or higher than nominal, leading to a lack of capacity or uncomfortable air temperature

Automatic Airflow Adjustment function will adapt the unit's fan speed to any ducting automatically (10 or more fan curves are available on every model), making installation much faster

Supporting a circular economy of refrigerants

Towards a circular economy of refrigerants

With L∞P by Daikin we want to step away from producing more waste. Instead we will reuse what is already available, in a qualitative way.

- Avoid the production of virgin refrigerant
- Greatly **reduces the CO₂ footprint of refrigerant production by 72%!**

For units produced and sold in Europe

- Exclusive to Daikin reclaimed gas is now used in our units
- Administratively allocated to VRV and chillers produced and sold in Europe

For more information visit
www.daikin.eu/loop-by-daikin

Replacement technology

Replace existing systems in the most cost-effective way

These benefits will convince your customer:
Drastically improve efficiency, comfort and reliability

No disturbance of daily operations

- Reuse of existing pipework results in fast installation
- Plan phases for minimal disruption
- Replace any VRF system

Lower installation costs

- Shorter installation time
- Use of existing piping and wiring
- Reuse of materials

Lower investment and reduced running costs

- CAPEX: Lower initial investment
- OPEX: Lower energy consumption and maintenance costs
- Keep your business running seamlessly

Higher property value

- Higher property value
- Improved facilities
 - Subsidies
 - Certifications (BREEAM, LEED and WELL)

Daikin's solution

- 1 Reuse drain pipes
- 2 Reuse refrigerant pipes
- 3 Reuse refrigerant branch pipes
- 4 Reuse remote control wiring
- 5 Reuse indoor-outdoor wiring

Only replace:

- 6 Indoor units
- 7 Outdoor units

Umeda Central Building, Osaka, Japan.

Replacement with VRV Q-series in 2006–2009. Capacity up from 1,620 to 2,322 HP while keeping the energy consumption the same!

VRV-Q benefits to increase your profit: Optimise your business

Watch our online seminar
on replacement VRV now!

Less installation time

Tackle more projects in less time thanks to faster installation. It is more profitable than replacing the full system with new piping.

Lower installation costs

Reducing installation costs enables you to offer customers the most cost-effective solution and improve your competitive edge.

Replace non-Daikin systems

NON DAIKIN **DAIKIN**

With VRV Q-series you can also replace non-Daikin systems with exactly the same benefits. Trouble-free and with Daikin expertise.

	VRV-Q, keeping indoor units	VRV-Q, replacing indoor units	Completely new installation with VRV 5
Remove outdoor unit	21 %	21 %	21 %

Install new refrigerant pipes	–	–	14 %
Install new indoor units and other tasks	–	21 %	21 %
Total installation time	49 %	78 %	100 %

Technology insight – Pipe cleaning and automatic refrigerant charging

Pipe cleaning and automatic refrigerant charging ensures a trouble-free operation.

Thanks to the pipe cleaning, possible contamination in the pipes is collected ensuring a trouble-free operation as with a completely new system.

The automatic charging ensures the correct amount of refrigerant is charged, so knowledge of the exact piping layout is not needed!

One touch convenience:

- Measure and charge refrigerant
- Test operation

Replacement VRV, heat recovery

Quick & quality replacement existing systems

- Cost effective and fast replacement as only the outdoor and indoor unit needs to be replaced, meaning almost no work has to be carried out inside the building
- Less intrusive and time consuming installation compared to installing a new system, as the refrigerant piping can be maintained
- Unique automatic refrigerant charge eliminates the need to calculate refrigerant volume and allows safe replacement of competitor replacement
- Automatic cleaning of refrigerant piping ensures a clean piping network, even when a compressor breakdown has occurred
- Possibility to add indoor units and increase capacity without changing the refrigerant piping
- Possibility to spread the various stages of replacement thanks to the modular design of the VRV system

Water-cooled series

Water-to-air heat pump for geothermal and high-rise applications

Components:

Outdoor unit

Indoor unit

Refrigerant
piping

(Geothermal)
water loop

High efficiency

- Superior efficiency, even in the most extreme outside conditions, thanks to geothermal operation
- 2-stage heat recovery: first stage between indoor units, second stage between outdoor units thanks to the storage of energy in the water circuit

2-stage heat recovery

- Reduce excessive energy use of the circulation pump thanks to standard control of inverter driven water pump

Flexible to design

- No need for ventilation or cooling the technical room thanks to the zero heat dissipation
- Seamless integration in the surrounding architecture as you cannot see the unit
- Highly suited for sound sensitive areas as there is no external operation sound

Zero heat dissipation principle

- No need for ventilation or cooling of the technical room
- Enhancing installation flexibility and reliability of parts

Easy to install and service

- Horizontal and vertical piping connection
- Minimum technical room requirements
- Easy to access all components

Horizontal or vertical piping connection

Minimal technical room space required

Easy access to components

Easy front plate removal

Rotating switchbox

Application example Geothermal operation

Benefits of this setup

- Very energy efficient
- Ground loop can be in service for a very long time, so future equipment upgrades/replacements are easy
- Vertical boreholes provide more stable water temperature (= Constant high efficiency) and do not occupy a lot of ground space.

When to use?

- When the soil is suitable for geothermal loops and there is availability of geothermal installation expertise locally
- For the projects with high requirements to energy efficiency, green building certification oriented

Expansion tank

Liquid heater

Strainer

Circulator Pump

Buffer tank

Heat exchanger

Flow valve
or flow control valve

Flow switch

Stop valve

Three way valve

RXYLQ-T

Cold climate series

Efficient heating down to -25°C

High heating capacity at low ambient temperatures

- Stable heating capacity available down to -15°C WB!

High partial load efficiency

- New vapour injection scroll compressor optimised for low load
 - UNIQUE back-pressure control: Pressure port increases pressure below the scroll in low load operation, preventing refrigerant leak and increasing efficiency
 - UNIQUE Injection structure with check valve: Prevents volume backflow during low load operation typically occurring with standard vapour injection compressors
- Variable Refrigerant Temperature adjusts refrigerant temperature to match the load

High reliability down to -25°C WB

- Hot gas bypass prevents ice buildup at the bottom of the heat exchanger

VRV IV+ heat pump, optimised for heating

Where heating is priority without
compromising on efficiency

SB.RKXYQ-T(8)

Invisible series

Outdoor for indoor installation,
when the outdoor unit must
be completely invisible

Unique
concept with
5 patents

Invisible

Invisible

- Completely invisible only the grilles are visible
- Seamless integration into surrounding architecture
- Highly suited to densely populated areas thanks to the low operation sound

Intuitive

- Total flexibility as the outdoor unit is split up in 2 parts
- Easy and quick to transport and install by just 2 persons
- Easy servicing, all components can be easily reached

Intelligent

- Patented V-shape heat exchanger for the most compact unit (400 mm high) ever
- Connectable to all VRV indoor units
- Provides a total solution when combined with ventilation units, Biddle air curtains and controls

Unique outdoor unit in 2 parts

Total solution

VRV indoor units

control systems

Biddle air curtain and ventilation

VRV IV+ heat pump for indoor installation

The invisible VRV

- Unrivalled flexibility because the unit is split up into two elements: the heat exchanger and the compressor

- Lightweight units (max. 105kg) can be installed by two people
- Unique V-shape heat exchanger results in compact dimensions (h/e unit only 400mm high) allowing false ceiling installation, while ensuring top efficiency
- Super efficient centrifugal fans (over 50% efficiency increase compared to sirocco fan)
- Small footprint compressor unit (760 x 554 mm) maximising useable floor space

(1) Cooling: indoor temp. 27°CDB, 19°CWB; outdoor temp. 35°CDB; equivalent piping length: 7.5m; level difference: 0m | (2) Heating: indoor temp. 20°CDB; outdoor temp. 7°CDB, 6°CWB; equivalent refrigerant piping: 7.5m; level difference: 0m | (3) Actual number of connectable indoor units depends on the indoor unit type and the connection ratio restriction for the system (50% ≤ CR ≤ 120%) | In accordance with EN/IEC 61000-3-12, it may be necessary to consult the distribution network operator to ensure that the equipment is connected only to a supply with S_{sc} ≥ minimum S_{sc} value | MCA must be used to select the correct field wiring size. The MCA can be regarded as the maximum running current. | MSC means the maximum current during start up of the compressor. This unit uses only inverter compressors. Starting current is always ≤ max. running current. | Maximum allowable voltage range variation between phases is 2% | Voltage range: units are suitable for use on electrical systems where voltage supplied to unit terminal is not below or above listed range limits. | The AUTOMATIC ESEER value corresponds with normal VRV4 Heat Recovery operation, taking into account advanced energy saving operation functionality (variable refrigerant temperature control operation) | The STANDARD ESEER value corresponds with normal VRV4 Heat Recovery operation, not taking into account advanced energy saving operation functionality | Sound values are measured in a semi-anechoic room. | Soundpressure system [dBA] = 10*log[10^(A/10)+10^(B/10)+10^(C/10)], with Unit A = A dBA, Unit B = B dBA, Unit C = C dBA | EN/IEC 61000-3-12: European/International technical standard setting the limits for harmonic currents produced by equipment connected to public low-voltage system with input current > 16A and ≤ 75A per phase | S_{sc}: Short-circuit power | For detailed contents of standard accessories, see Installation/operation manual | Multi combination (10-54HP) data is corresponding with the standard multi combination | Contains fluorinated greenhouse gases

Individual branch selector for VRV IV heat recovery

- Unique range of single and multi BS boxes for flexible and fast design
- Compact & light to install
- Ideal for remote rooms as no drain piping is needed
- Allows integration of server rooms into the heat recovery solution thanks to technical cooling function
- Connect up to 250 class unit (28kW)

- **UNIQUE** Faster installation thanks to open port connection
- Allows multi tenant applications
- Connectable to REYQ-T, RQCEQ-P3 and RWEYQ-T8 heat recovery units

BS-Q14AV1B

Multi branch selector for VRV IV heat recovery

- Unique range of single and multi BS boxes for flexible and fast design
- Major reduction in installation time thanks to wide range, compact size and light weight multi BS boxes
- Up to 70% smaller and 66% lighter than previous series
- Faster installation thanks to a reduced number of brazing points and wiring
- All indoor units connectable to one BS box
- Less inspection ports needed compared to installing single BS boxes
- Up to 16kW capacity available per port
- Connect up to 250 class unit (28kW) by combining 2 ports
- No limit on unused ports allowing phased installation
- **UNIQUE** Faster installation thanks to open port connection

- **UNIQUE** Refrigerant filters for high reliability
- Allows multi tenant applications
- Connectable to REYQ-T, RQCEQ-P3 and RWEYQ-T8 heat recovery units

Products overview **VRV IV**

Capacity class (kW)

Type	Model		Product name		15	20	25	32	40	50	63	71	80	100	125	140	200	250	
Ceiling mounted cassette	UNIQUE Round flow cassette	360° air discharge for optimum efficiency and comfort - Auto cleaning function ensures high efficiency - Intelligent sensors save energy and maximise comfort - Flexibility to suit every room layout - Lowest installation height in the market! - Widest choice ever in decoration panel designs and colors		FXFQ-B			•	•	•	•	•	•	•	•	•			UV Streamer kit	
	UNIQUE Fully flat cassette	- Unique design that integrates fully flat into the ceiling - Perfect integration in standard architectural ceiling tiles - Blend of iconic design and engineering excellence - Intelligent sensors save energy and maximise comfort - Small capacity unit developed for small or well-insulated rooms - Flexibility to suit every room layout		FXZQ-A		•	•	•	•	•	•								
	2-way blow ceiling mounted cassette	- Thin, lightweight design installs easily in narrow ceiling spaces - Depth of all units is 620mm, ideal for narrow ceiling spaces - Flexibility to suit every room layout - Reduced energy consumption thanks to DC fan motor - The flaps close entirely when the unit is not operating - Optimum comfort with automatic air flow adjustment to the required load		FXCQ-A			•	•	•	•	•	•	•	•		•			
	NEW 1-way blow cassette	1-way blow unit for corner installation - Compact dimensions enable installation in narrow ceiling voids - Flexible installation thanks to different air discharge options - New modern decoration panel		FXKQ-A			•	•	•	•	•							Available summer '24	
Concealed ceiling	Slim concealed ceiling unit	- Slim design for flexible installation - Compact dimensions enable installation in narrow ceiling voids - Medium external static pressure up to 44Pa - Only grilles are visible - Small capacity unit developed for small of well-insulated rooms - Reduced energy consumption thanks to DC fan motor		FXDQ-A3		•	•	•	•	•	•	•						Auto cleaning filter option Multi zoning option	
	Concealed ceiling unit with medium ESP	- Slimmest yet most powerful medium static pressure unit on the market! - Slimmest unit in class, only 245mm - Low operating sound level - Medium external static pressure up to 150Pa facilitates using flexible ducts of varying lengths - Automatic air flow adjustment function measures the air volume and static pressure and adjusts it towards the nominal air flow, guaranteeing comfort		FXSQ-A		•	•	•	•	•	•	•	•	•	•	•		Multi zoning option	
	Concealed ceiling unit with high ESP	- ESP up to 200, ideal for large sized spaces - Optimum comfort guaranteed no matter the length of ductwork or type of grilles, thanks to automatic air flow adjustment - Reduced energy consumption thanks to DC fan motor - Flexible installation as the air suction direction can be altered from rear to bottom suction		FXMQ-P7															
	Concealed ceiling unit with high ESP	- ESP up to 250, ideal for extra large sized spaces - Only grilles are visible - Large capacity unit: up to 31.5 kW heating capacity		FXMQ-A														•	•
Wall mounted	Wall mounted unit	- For rooms with no false ceilings nor free floor space - Flat, stylish front panel is more easy to clean - Small capacity unit developed for small of well-insulated rooms - Reduced energy consumption thanks to DC fan motor - The air is comfortably spread up- and downwards thanks to 5 different discharge angles		FXAQ-A		•	•	•	•	•	•	•							
Ceiling suspended	Ceiling suspended unit	- For wide rooms with no false ceilings nor free floor space - Ideal for comfortable air flow in wide rooms thanks to Coanda effect - Rooms with ceilings up to 3.8m can be heated or cooled very easily! - Can easily be installed in both new and refurbishment projects - Can even be mounted in corners or narrow spaces without any problem - Reduced energy consumption thanks to DC fan motor		FXHQ-A					•		•			•					
	UNIQUE 4-way blow ceiling suspended unit	- Unique Daikin unit for high rooms with no false ceilings nor free floor space - Rooms with ceilings up to 3.5m can be heated up or cooled down very easily! - Can easily be installed in both new and refurbishment projects - Intelligent sensors save energy and maximise comfort - Flexibility to suit every room layout - Reduced energy consumption thanks to DC fan motor		FXUQ-A									•		•				
Floor standing	Floor standing unit	- For perimeter zone air conditioning - Can be installed in front of glass walls or free standing as both the front and the back are finished - Ideal for installation beneath a window - Requires very little installation space - Wall mounted installation facilitates cleaning beneath the unit		FXLQ-P			•	•	•	•	•	•							
	Concealed floor standing unit	- Ideal for installation in offices, hotels and residential applications - Discretely concealed in the wall, leaving only the suction and discharge grilles visible - Can even be installed underneath a window - Requires very little installation space as the depth is only 200mm - High ESP allows flexible installation		FXNQ-A			•	•	•	•	•	•							
Cooling capacity (kW)1						1.7	2.2	2.8	3.6	4.5	5.6	7.1	8.0	9.0	11.2	14.0	16.0	22.4	28.0

(1) Nominal cooling capacities are based on: indoor temperature: 27°CDB, 19°CWB, outdoor temperature: 35°CDB, equivalent refrigerant piping: 5m, level difference: 0m

(2) Nominal heating capacities are based on: indoor temperature: 20°CDB, outdoor temperature: 7°CDB, 6°CWB, equivalent refrigerant piping: 5m, level difference: 0m

Type	Model	Product name	Door height (m)	Installation condition
Biddle air curtain	Free-hanging	- Easy wall mounted installation - Connectable to ERQ and VRV units - Unified range for R-32 and R-410A refrigerant - Payback period of less than 1.5 years compared to installing an electric air curtain	CYA-DK-F	
	Cassette	- Mounted into a false ceiling leaving only the decoration panel visible - Connectable to ERQ and VRV units - Unified range for R-32 and R-410A refrigerant - Payback period of less than 1.5 years compared to installing an electric air curtain	CYA-DK-C	
	Recessed	- Neatly concealed in the ceiling - Connectable to ERQ and VRV units - Unified range for R-32 and R-410A refrigerant - Payback period of less than 1.5 years compared to installing an electric air curtain	CYA-DK-R

(1) Decoration panel needed (BYCQ140E - white with grey louvers / BYCQ140EW - full white / BYCQ140EB - black).

(2) Decoration panel needed (Auto cleaning panels: BYCQ140EGF - white / BYCQ140EGFB - black) + BRC1E* or BRC1H*.

(3) Decoration panel needed (BRC7EB530W (standard panel) / BRC7F530W (white panel) / BRC7F530S (grey panel)).

(4) To connect stylish indoor units a BPMKS unit is needed.

(5) A mix of RA indoor units and VRV indoor units is not allowed.

(6) Only in heat pump operation.

Domestic hot water hydroboxes

Outdoor units connecting to hydroboxes

- For efficient hot water production and space heating
- No more fossil fuels need on-site
- DX hydroboxes save time on system design as all water-side components are fully integrated with direct control over leaving water temperature

Low temperature hot water production

- Air to water connection to VRV for applications such as underfloor, air handling units, low temperature radiators, ...
- Leaving water temperature range from 5°C to 45°C without electric heater
- In combination with VRV IV+ Heat pump and water-cooled unit

High temperature hot water production

- Air to water connection to VRV for applications such as bathrooms, sinks, underfloor heating, radiators and air handling units
- Leaving water temperature range from 25 to 80°C without electric heater
- „Free“ heating and hot water production provided by transferring heat from areas requiring cooling to areas requiring heating or hot water
- Possibility to connect thermal solar collectors to the domestic hot water tank
- In combination with VRV IV+ Heat pump and water-cooled unit

Low temperature hydrobox for VRV

For high efficiency space heating and cooling

Tightfit

Daikin Tightfit is a non-brazed connection suitable for refrigerant piping. **Pipes can be joined easily and quickly without brazing or using any special tools.** It meets stringent safety requirements and provides leak-free tightness.

- Double edged claw catches the pipe to form tight, **mechanical sealing ISO 14903 certified**
- Specially developed REFNET allows direct connection to Tightfit joints
- Unique mechanical and resin sealing prevents any leak
- Extremely durable: can withstand up to 4 times the maximum operating pressure of R-32 refrigerant (17.2 Mpa)

Tightfit Mechanism

Daikin Tightfit is awarded 3 Ticks Excellent Rating by Singapore Green Building Product (SGBP) scheme. SGBP is a certification for green building products and materials, ensuring that sustainability is integrated throughout the design and manufacturing process of green building products.

Installation in 4 easy steps

1 Mark the insertion line

Mark the insertion 'T' or 'L' standard line with the marking gauge and marker pen at the proper position of each pipe size.

2 Insert the pipe

1. Insert firmly by hand until the pipe stops.
2. Make sure that the insertion standard line is no longer visible.

3 Tighten the nut

1. Hold the main body and tighten the nut by hand
2. Hold the main body and tighten the nut with a monkey wrench, until the green indicator disappears and the nut comes into contact with the flat face of the body.

4 Check

1. Green indicator should be hidden.
2. Place the marking gauge on the end face of the nut and make sure that the 'T' or 'L' shaped mark falls completely within the notch in the marking gauge.

Tightfit Refnet

Install Smarter

No slope, no clogs

NEW

No-Slope drain kit

VRV SkyAir

Designed for hassle-free HVAC installations

Conventional configuration

- ! Careful planning required to avoid beams, ducting, and other ceiling obstructions
- ! Holes may need to be drilled in beams when ceiling voids are too tight or routing can't avoid them
- ! Risk of clogged pipes

No-Slope drain kit

Our slope-free drain kit changes the game.

- ✓ **No slope calculation required:** Run drain pipes flat or even upwards to bypass structural elements like beams and ducts.
- ✓ **Clog-resistant design:** Anti-bacterial copper eliminates slime buildup and blockages.
- ✓ **Flexible installation:** Ideal for tight ceiling spaces and retrofit projects.
- ✓ **Time-saving:** Simplifies planning and speeds up installation, as drain hanging can be combined with refrigerant piping.

Quality assured: 20 year testing

A 20-year verification test was conducted with a slope-free drain using copper pipes.

Results confirmed that the drain remained unclogged and contained no slime, corrosion, or pitting on the inner surface of the copper pipes.

Test conditions

- Constructed in Daikin office in 2004
- Tested model: FXYFP71M (Ceiling mounted cassette)
- Drain piping: ø9.5 coated copper tube (6 m)

Options & accessories - *VRV* outdoor

		R-32		R-32	
		VRV 5 heat recovery		VRV 5 heat pump	
		REYA8-20 REMA5	2 module systems	RXYA 8~20 RYMA5	2-module systems
Kits	Multi-module connection kit (obligatory) - Connects multiple modules into a single refrigerant system		2 modules: BHFQ23P907A		2 modules: BHFA22P1007
	Central drain pan kit - Installs onto the underside of the outdoor unit and collects drain water from all bottom plate outlets into a single outlet. In cold areas should be heated by a field-supplied heater to prevent drain water from freezing in the drain pan.				
	Bottom plate heater - To keep drain holes ice-free in extreme weather conditions (one per outdoor unit needed)	5/8-12: EKBPH012TA 14-20: EKBPH020TA	1 kit per system	5/8-12: EKBPH012TA 14-20: EKBPH020TA	1 kit per system
Adapters	External control adapter for outdoor unit - Allows to activate Low Noise Operation and three levels of demand control, limiting power consumption via external dry contacts. Connects to the F1/F2 communication line and requires power supply from an indoor unit, BSVQ box, or VRV-WIII outdoor unit.	DTA104A53/61/62 For installation into an indoor unit: exact adapter type depends on type of indoor unit. For 14-20 HP the demand PCB mouting plate is required (2). See Options & Accessories of indoor units			
	KRC19-26 Mechanical cool/heat selector – allows to switch an entire Heat Pump system, or one BS-box of a Heat Recovery system between cooling, heating and fan only. Connects to the A-B-C terminals of the outdoor unit / BS-box.			• (3)

		REYQ8-20 REM5	2/3 module systems	RYMQ8-20 RXYQ8-20	2/3 module systems
Kits	Multi-module connection kit (obligatory) - Connects multiple modules into a single refrigerant system		2 modules: BHFQ23P907A 3 modules: BHFQ23P1357		2 modules: BHFQ22P1007 3 modules: BHFQ22P1517
	Central drain pan kit - Installs onto the underside of the outdoor unit and collects drain water from all bottom plate outlets into a single outlet. In cold areas should be heated by a field-supplied heater to prevent drain water from freezing in the drain pan.				
	Bottom plate heater - To keep drain holes ice-free in extreme weather conditions (one per outdoor unit needed)	5/8-12: EKBPH012T7A 14-20: EKBPH020T7A		8-12: EKBPH012T7A 14-20: EKBPH020T7A	
Adapters	External control adapter for outdoor unit - Allows to activate Low Noise Operation and three levels of demand control, limiting power consumption via external dry contacts. Connects to the F1/F2 communication line and requires power supply from an indoor unit, BSVQ box, or VRV-WIII outdoor unit.	DTA104A53/61/62 For installation into an indoor unit: exact adapter type depends on type of indoor unit. For 14-20 HP the demand PCB mouting plate is required (2). See Options & Accessories of indoor units			
	KRC19-26 Mechanical cool/heat selector – allows to switch an entire Heat Pump system, or one BS-box of a Heat Recovery system between cooling, heating and fan only. Connects to the A-B-C terminals of the outdoor unit / BS-box.			• (3)	1 kit per system (3)
	Cool/heat selector PCB (Required to connect KRC19-26)			BRP2A81	1 kit per system
Others	EKCHSC Cool/heat selector cable (Required to connect KRC19-26)				
	EKPCCAB4 VRV configurator			•	
	DTA109A51 DIII-net expander adapter				
	BPMKS967A2/A3 Branch provider (for connection of 2/3 RA indoor units)			•	
	EKDK04 Drain plug kit				

(1) For installations with special requirements towards fire regulations, the insulation material can be replaced using kits EKHBFO1 and EKHBFO2.

The kits contain insulation material that complies with EN13501-1:B-S3,dO and BS476-7 (class 1)

(2) Requires mounting plate EKSB26B2* for 14~20HP

(3) Requires installation box KJB111A

(4) Only possible to install 1 adapter PCB

(5) Backup heater kit is only required in some operating conditions. For more information, see the operation range drawing.

	Air discharge adapter for round duct				
	L-type piping kit				
	Insulation kit for high humidity				

(1) Pump station is necessary for this option

(2) Installation box is necessary for these adapters

(3) The BYCQ140EW has white insulation. Be informed that formation of dirt on white insulation is visibly stronger and that it is consequently not advised to install the BYCQ140EW decoration panel in environments exposed to concentrations of dirt

(4) Not recommended because of the limitation of the functions

(5) To be able to control the BYCQ140EGF(B) the controller BRC1E or BRC1H/BRC1K* is needed

(6) The BYCQ140EGF(B) is not compatible with Multi and Split Non-Inverter Outdoor units

(7) Option not available in combination with BYCQ140EGF(B)

(8) Both parts of the fresh air intake are needed for each unit

(9) Cannot be combined with sensor kit

(10) Independently controllable flaps function not available

(11) Only possible in combination with BRC1H* / BRC1K* / BRC1E*

(19) The BYFQ60C4* R-32 panels can be connected to R-410A indoor units with wire harness EKRS22

(20) Wire harness EKRS23 is necessary

(21) Filter chamber needed (BDD500B250)

(22) Only possible in combination with BYCQ140E and BYCQ140EW. Cannot be combined with other filters, chambers, fresh air intake kits or air discharge outlet sealing member kit

(23) Requires demand PCB

(24) Can only be used in combination with wireless room thermostat

(25) If tank is NOT mounted on top of the HXHD unit, then option EKMAHTB is needed to install tank as stand alone

(26) Only possible in combination with BYCQ140E/EW/EB. Cannot be combined with other filters, chambers, fresh air intake kits or discharge outlet sealing member kit
